

PG-C2-LES CONVERSIONS D'ÉNERGIE

Consigne : A partir des cartes distribuées, compléter les diagrammes de conversion d'énergie suivants en y indiquant la source de l'énergie, la forme d'énergie initiale et la forme d'énergie produite.

The image displays eight identical energy conversion diagrams arranged vertically. Each diagram consists of a rounded rectangular box on the left, followed by a right-pointing arrow, then an oval in the center, followed by another right-pointing arrow. The boxes and ovals are empty, intended for students to write the source of energy, the initial form of energy, and the produced form of energy. Each diagram is framed by two horizontal dashed lines, one above and one below the central elements.
